

DESCRIPTION OF DATABASE

Targeting practicing physicians who have participated in FDA-approved clinical drug trials is made simple by using this database. The list features each physician's name, specialty, complete contact information, date of last clinical trial and number of clinical trial participations. Physician prescription decile data is also available through SK&A's PrescriberPlus service.

Offers excellent results for: recruiting experienced physicians for clinical trials or market research surveys; and marketing and advertising for pharmaceuticals, CME programs, recruitment services, patient compliance programs, practice software, medical equipment and supplies, office needs and publication subscriptions.
