INDUSTRY NEWS

One-fourth of Physicians Report Drop in CME Quality. A survey conducted in December 2011 by MDLinx showed that 26 percent of physician respondents reported a decrease in the quality of CMEs. Sixty-four percent reported no change in quality, and 9 percent said the quality had increased. According to an article from MM&M, funding for CMEs has dropped by hundreds of millions of dollars over the past four years. Find out physicians' feedback on why CME quality seems to have decreased. Pharmacists, Nurses Most Trusted Professionals. Results from Gallup's annual "Honesty and Ethics" survey last month concluded that pharmacists and nurses are considered the top-two most trusted professionals by Americans. Nurses beat out pharmacists by 11 points, with an 84-percent rating. Find out more about the survey findings. [Read more.](#)

LISTS & DATABASES

Office-Based Physician Database Has Most Sites Ever. Over the last year, SK&A has added 18,281 medical sites to its Office-Based Physician database. Now with profiles for 262,292 sites throughout the U.S., the database is the most inclusive and customizable resource SK&A has to offer. It contains a total of 1.2 million professionals, including over 700,000 prescribers, and it is always 100-percent telephone-verified in SK&A's Research Center every six months. [Learn more.](#)
